## KEY TO THE CHART

The **GEOGRAPHY** of Christ's life is shown by the eight horizontal bands corresponding to the divisions on the map of Palestine. This shows at a glance the locality of every event. Cities and towns are shown as black dots. Whenever a town is revisited, it is always on one level. By glancing along the line representing Capernaum or Jerusalem, one can see just what portion of Christ's ministry was exercised at either place. The last week of His life was confined to Jerusalem and vicinity. This period is, therefore, illustrated by a map of the city and its environs.

The **CHRONOLOGY** of Christ's life is shown at the top of the chart. There is first a sevenfold division into periods, marking out the great eras of his life. The years are defined by heavy vertical lines, and the months by lighter lines. Passovers appear as vertical green stripes. In the last week, each day is shown, and even the hours of the day.

The **HARMONY OF THE GOSPELS** is graphically exhibited at the bottom of the chart. The four colored bands show the part contributed by each gospel writer. The numbers refer to chapter and verse where the events displayed above are recorded.

The **PATHWAY OF CHRIST** is the slightly transparent line that starts at Bethlehem and progresses through the countries and through the years to the Ascension at Bethany. The events of His life are given in full in the space below the chart and are referred to by numbers along the pathway, at the points where they probably occurred. Miracles are in *italics*, and parables are **bold**.
